COMPAÑÍA Pensamiento computacional

Visual Studio interface showing a C# program named `Program.cs` being debugged. The program compares two strings and checks if one contains the other.

**Program.cs Code:**

```
10 string text1 = " ";
11 string palabra = " ";
12 Console.WriteLine(value1.Trim().ToLower() == value2.Trim().ToLower());
13 Console.WriteLine("Hola, ingrese texto");
14 texto = Console.ReadLine();
15 Console.WriteLine("ingrese palabra a comparar");
16 palabra = Console.ReadLine();
17 Console.ReadLine();
18 Console.WriteLine("contains:" + texto.Contains(palabra));
19 Console.WriteLine("Starts With: " + texto.StartsWith(palabra));
20 Console.WriteLine("Ends With: " + texto.EndsWith(palabra));
21 Console.ReadKey();
22 }
23 }
24 }
25 }
26 }
```

**DEBUG CONSOLE OUTPUT:**

```
Starts With: False
Ends With: False
PS C:\Users\Usuario\Documents\URL_PC\Hello_word\semana7> dotnet run
True
Hola, ingrese texto
pablo tiene hambre
ingrese palabra a comparar
hambre

contains:True
Starts With: False
Ends With: True
```

**TERMINAL:**

```
powershell
dotnet
```
